Definition - An unauthorized disclosure is defined as a communication or physical transfer of classified information or material to an unauthorized person. Reportable unauthorized disclosure cases are those which involve the release and disclosure of classified information, either deliberate or inadvertent, as contrasted to physical security violations such as, for example, an unattended open safe, or the confirmed loss of control of a classified document. It includes, but is not limited to, unauthorized disclosure of classified information in a newspaper, journal or other publication or any other communications media where such information is traceable to a Department because of a direct quotation, or other uniquely identifiable fact. The principal criteria for determining whether an unauthorized disclosure is reportable to the ICRC include both: (1) the release and disclosure are of sufficient importance to warrant formal investigation; and (2) the formal investigation confirms that an important disclosure did occur.
